

How will you change the world?

Samantha cultivated bacteria to eat up oil spills and clean the environment

Put your talents and your passion to the test. Sign up for the Sanofi BioGENEius Challenge Canada* (SBCC) and get to work at making a difference through science.

The SBCC isn't like other science competitions. Here you get to propose and design your own research project—in health, agriculture, the environment, wherever your interests lie—and work with **real scientists in real labs** to see it through. You'll have the chance to compete with other high school students from your region and across Canada and—if you're a finalist—internationally. Plus the SBCC gives you the chance to win **cash prizes, scholarships** and more.

Don't wait! Sign up today. Discover how you can change the world.
