

## Proposal Writing Workshop 2012

**Internet:** e-mail: [sbcc.edmonton@bioalberta.com](mailto:sbcc.edmonton@bioalberta.com)  
Webpage: <http://sanofibiogeneiuschallenge.ca/>  
Facebook: Edmonton & National page

**Proposal Submission Deadline:** Online: November 10, 2011  
Hardcopy: November 10, 2011

**NOTE:** Your teacher needs to sign-off your proposal and they will need a day or two so make your deadline the 7-8th! Your principal also needs to sign it.

### **TIDBITS TO REMEMBER:**

**\*Infectious Agents:** Most institutions have rules concerning who may work with infectious agents. If you want to work with a highly infectious agent it is unlikely you will be allowed to handle it. You may want to focus on a specific protein or process that can be studied in another system. If you are in contact with a potential mentor—ask them what you may or may not handle.

**\*Animal Studies:** You cannot do studies where you are specifically handling the animals in a manner that may cause them harm (death). You may obtain tissues, cells, organs, etc... if they are humanely salvaged from another project occurring in the lab.

**\*Accepted Work:** Lab work only performed from July on will be accepted for the competition. If you participated in SABC 2010, you may use the same mentor but the project **MUST BE DIFFERENT**. You will have to write a letter outlining the differences in your proposal submission.

**\*Proposal:** 1200 words or less. Each section only needs to be a short paragraph or even 1 to 2 sentences.
